WHAT YOU SHOULD KNOW: Welcome to the Aerospace & Defense Digest, where we highlight a few key stories and themes from the prior week and break down their implications for our coverage and the broader industry. In this edition: NASA releasing the draft Commercial Low Earth Orbit Destinations (CLD) Phase 2 RFP, Lockheed Martin's (LMT, Not Rated) $3.45bn acquisition of Ultra Maritime, Blue Origin's (Private) reported $10bn capital raise at a $130bn valuation, Anduril's (Private) agreement with PGZ (Polish state-owned) to localize production of the Barracuda-500M missile in Poland, Ondas' (ONDS, Not Rated) $875.8mn acquisition of DZYNE Technologies (Private), nLight (LASR, Not Rated) and Lockheed Martin receiving an $86mn OTA under the Joint Laser Weapon Systems (JLWS) program, BETA Technologies' (BETA, Buy, $33 PT) first flights under the eVTOL Integration Pilot Program (eIPP), New Horizon Aircraft's (HOVR, Not Rated) selection of BETA's flight control system for the Cavorite X7, Impulse Space (Private) and Relativity Space (Private) joining the Space Force's National Security Space Launch (NSSL) Phase 3 Lane 1 program, and Aurelius' (Private) Archimedes laser weapon system being integrated onto Rheinmetall (RHMBY, Not Rated) unmanned ground vehicles.

- **NASA releases CLD draft RFP.** The agency intends to award firm-fixed-price, IDIQ contracts to support development, certification, and services. By doing this, NASA would be able to select two or more contractors through early development, followed by a competitive task order for final design, test, evaluation, as well as certification and services from one or more contractors. **OUR TAKE:** Industry was hoping for the CLD Phase 2 RFP to be released in early July, meaning this news came on time. We view Voyager Technologies' (VOYG, Buy, $55 PT) Starlab space station as a leader in this tech area, with Vast (Private), Orbital Reef (partnership between Blue Origin and Sierra Space [both Private]) and others posing as other viable candidates to replace the ISS.
- **Lockheed Martin acquires Ultra Maritime for $3.45bn.** Ultra Maritime is a manufacturer of undersea warfare and anti-submarine warfare capabilities including sonar technologies, sonobuoys, torpedo defense systems, radar solutions, and autonomous maritime sensing platforms. The deal implies 4x sales and 22x EBITDA on 2026 estimates. Separately, Thales (THLLY, Not Rated) agreed to buy French underwater-drone maker Exail (EPA: EXA, Not Rated) for $4.5bn. **OUR TAKE:** This is the fourth-largest acquisition LMT has ever made, behind its $9bn acquisition of Sikorsky from United Technologies (now RTX, Not Rated) in 2015. As the Trump administration has pushed defense contractors to reinvest instead of return capital to shareholders, we believe more M&A could be in the cards for the primes. However, we note defense tech valuations remain a gating factor.
- **Blue Origin raising $10bn at $130bn valuation, tapping outside funding for the first time.** Founder Jeff Bezos is said to be committing $2bn. **OUR TAKE:** In May, the company's New Glenn rocket exploded at its only active orbital launch facility. Following the explosion, we called out that we would not be surprised to see Blue Origin tap outside capital (see A&D Digest #91). We believe the $10bn will be critical to Blue Origin achieving its goal of flying again this year as it needs to repair the launchpad. We believe the funding could also support its new satellite internet network, TeraWave, which was announced in January (see A&D Digest #73).

- **Anduril and PGZ agree to establish localized production of the surface-launched Barracuda-500M missile in Poland.** PGZ's subsidiary WZL-2 and Anduril will produce thousands of SLB-500M systems for the Polish Armed Forces. Throughout time, the supply chain will be increasingly localized, with the goal of eventually making the Polish Barracuda a majority European-made product. Similarly, RTX announced it is working with European companies, including Diehl Defence (Private), to double Stinger missile production in response to growing global demand. **OUR TAKE:** We believe Europe is increasingly looking to license-produce proven US defense technologies while localizing production domestically, rather than investing heavily to develop competing capabilities from scratch. In our view, the most successful approaches will likely follow a phased strategy: initial procurement of US-made systems, gradual localization of manufacturing, and an eventual supply chain with substantial locally sourced content. This framework could accelerate capability fielding while helping European nations strengthen their own defense-industrial bases.
- **Ondas acquires DZYNE Technologies for $875.8mn.** DZYNE adds three strategic franchises to the Ondas platform: long-endurance ISR, counter-UAS, and autonomous effects. The company is expected to generate $191mn of revenue in 2026 and more than $300mn in 2027, while already operating at positive EBITDA. EBITDA margins are targeted in the mid-teens by 2027 and the mid-20% range by 2028. DZYNE is projected to grow revenue at an 80% CAGR from 2025-2028. The transaction will be financed with $200mn of cash and $675mn of stock. **OUR TAKE:** According to DACIS, DZYNE has received $335.5mn worth of obligations since its founding in 2012. Based on publicly available information, the company does not currently have a standalone Program of Record (PoR). We believe DZYNE's expanded scale, resources, and customer access under Ondas could improve its prospects for securing a PoR in the future.
- **nLight and Lockheed Martin awarded combined $86mn OTA under the JLWS program.** The total program ceiling is $847mn. nLight alone was awarded a $44mn task order with a total program ceiling of up to $627mn. JLWS is designed to transition directed energy capabilities from demonstration prototype to field-ready, production-oriented platforms. Initial prototypes will be rated at ~150kW, but subsequent iterations will be scaled to reach the 300-500 kW range. Additionally, by leveraging a laser source developed under the High Energy Laser Scaling Initiative (HELSI), a 500kW integrated system will concurrently be developed. **OUR TAKE:** These systems operate at substantially higher power levels than AV's (AVAV, Buy, $205 PT) LOCUST (20-35+ kW) and are being designed to defeat more demanding targets such as cruise missiles. We believe this award is another sign that the directed energy market is gaining momentum, and we expect additional program awards and funding announcements to materialize over the near term.
- **BETA completes first flights under eIPP.** The flights, which carried manufactured organs developed by United Therapeutics (UTHR, Neutral, Analyst: Julian Harrison) covered ~275 nautical miles between Virginia Tech/Montgomery Executive Airport (KBCB) in Blacksburg, VA; Charlottesville-Albemarle Airport (KCHO) in Charlottesville, VA; Frederick Municipal Airport (KFDK) in Frederick, MD; and Martin State Airport (KMTN) in Baltimore County, MD. **OUR TAKE:** BETA continues to strengthen its position as a leader in advanced air mobility. The company was selected for seven of the eight eIPP launch programs and is the first participant to conduct flights under the initiative. We view the milestone as an important validation of the practical commercial use cases for advanced air mobility aircraft and a positive step toward broader market adoption.
- **New Horizon Aircraft selects BETA to provide advanced flight control computers and software for its Cavorite X7 hybrid-electric VTOL.** BETA's flight control computer is designed to support certification pathways for FAA Part 21.17(b) powered-lift, Part 23, and Part 25 applications, as well as future international regulatory frameworks including Transport Canada and EASA requirements. **OUR TAKE:** BETA continues to execute on its strategy of being a merchant supplier of choice to other eVTOL manufacturers. Last year, the company announced a $1bn contract with Eve Air Mobility (EVEX, Neutral) to supply pusher motors for Eve's conforming prototypes and production aircraft.
- **Impulse Space and Relativity Space both onramped to the Space Force's National Security Launch phase Three Lane 1 program.** The program provides launch services delivering national security space payloads into their intended orbits. Impulse will provide its Helios upper stage that will transport satellites to their desired orbit and Relativity will provide its medium-lift Terran R rocket currently under development. **OUR TAKE:** Impulse Space and Relativity Space are the first additions to the NSSL Phase 3 Lane 1 program since last March, when Rocket Lab (RKLB, Neutral) and Stoke Space (Private) joined the existing roster of SpaceX (SPCX, Not Rated), ULA (a JV between LMT and Boeing (BA, Not Rated), and Blue Origin (see recap). The IDIQ contract is worth $5.6bn, though a successful launch is required before a provider can compete for task orders, meaning only SpaceX, ULA, and Blue Origin are currently eligible to win work. While we view the Space Force's efforts to diversify its launch supplier base favorably, SpaceX remains the sole provider to have actually launched under the program and has been obligated $1.2bn to date.

- **Aurelius puts Archimedes laser weapon system on American Rheinmetall UGVs.** Archimedes is a sub-10kW class laser that can shoot down Group 1 (and, according to the company, Group 2) drones. **OUR TAKE:** We view the integration as another example of directed energy systems migrating beyond fixed installations and onto mobile platforms. For example, under the Army's AMP-HEL prototyping program, AV delivered four LOCUST systems, including two integrated onto Infantry Squad Vehicles and two mounted on Joint Light Tactical Vehicles (JLTVs). We expect mobility and platform integration to become increasingly important differentiators as C-UAS continues to proliferate.

Notable contract awards for the week of July 6-10:

- **July 6:** $499.6mn IDIQ contract to L3Harris (LHX, Not Rated) for the Missile Defense Agency Flight Test Airborne Sensors (ABS) program.
- **July 7:** $55.7mn cost-no-fee, cost-plus-fixed-fee, firm-fixed-price contract to DRS Network & Imaging Systems (DRS, Buy, $50 PT) for engineering services in support of the Improved Bradley Acquisition Subsystem.
- **July 8:** $502.4mn cost-no-fee, cost-plus-fixed-fee, firm-fixed-price contract to Lockheed Martin for post-production support services for the Modernized Target Acquisition Designation Sight/Pilot Night Vision Sight systems for AH-64 aircraft.
- **July 9:** $11.0mn firm-fixed-price contract to X-Bow Launch Systems (Private) to design, develop, and demonstrate a high-performance solid rocket motor (SRM) as part of the Missile Defense Agency's (MDA) Rapid Response Small Launcher Technology program.
- **July 10:** $25.3mn cost-plus-fixed-fee contract to Booz Allen Hamilton (BAH, Not Rated) for research, development, test, and evaluation of quantum information science technology.

I, Andre Madrid, hereby certify that the views about the companies and securities discussed in this report are accurately expressed and that I have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this report.

Regulatory Disclosures

Ratings Definitions

BTIG LLC's ("BTIG") ratings, effective June 12, 2017, are defined as follows:

BUY – A security which is expected to produce a positive total return of 15% or greater over the 12 months following the recommendation. The BUY rating may be maintained as long as it is deemed appropriate, notwithstanding price fluctuations that would cause the target to fall outside of the 15% return.

SELL – A security which is expected to produce a negative total return of 15% or greater over the next 12 months following the recommendation. The SELL rating may be maintained as long as it is deemed appropriate, notwithstanding price fluctuations that would cause the target to fall outside of the 15% return.

NEUTRAL – A security which is not expected to appreciate or depreciate meaningfully over the next 12 months.

NOT RATED – A security which is not rated or covered by BTIG.

UNDER REVIEW – Effective immediately, coverage of the following securities is Under Review. Ratings, price targets, disclosures, and estimates for the companies listed below are suspended and should no longer be relied upon.

Distribution of Ratings and Investment Banking Clients

BTIG must disclose in each research report the percentage of all securities rated by the member to which the member would assign a "buy", "neutral" or "sell" rating. The said ratings are updated on a quarterly basis. BTIG must also disclose the percentage of subject companies within each of these three categories for whom the member has provided investment banking services within the previous twelve months.

Current Rating Distribution (as of July 12, 2026):

Coverage Universe	Count	Percent	Inv. Banking Relationships	Count	Percent
Buy	367	66.8%	Buy	121	33.0%
Neutral	179	32.6%	Neutral	47	26.3%
Sell	3	0.6%	Sell	0	0.0%

For purposes of FINRA ratings distribution rules, BTIG's stock ratings of Buy, Neutral and Sell fall into Buy, Hold and Sell categories, respectively.

General Disclosures

Research reports produced by BTIG LLC ("BTIG") are published for and intended to be distributed solely to BTIG institutional and corporate clients. Recipients of BTIG reports will not be considered clients of BTIG solely because they may have received such BTIG report.

To the extent recipient accesses BTIG research, whether on a BTIG research website or through a third-party platform, BTIG is able to search, filter, download and review information on the readership of BTIG's research, including the specific research consumed and the name, company name, email address and, in certain circumstances, the location of the individual who accessed the research (the "Readership Information"). Recipient consents to BTIG's receipt of the Readership Information, including receipt of that information from a third party.

Without BTIG's prior written consent, recipients of BTIG research reports and any other BTIG material whether accessed from a BTIG research website, by email or other electronic means, or through a third-party platform are not permitted to use, in whole or in part, BTIG research reports or any other BTIG material, in connection with or to enable development of machine learning, or other similar technologies, or to train third-party or proprietary artificial intelligence technologies, models, software, platforms, tools or similar technologies, or as a prompt or input to any such technologies.

The research analyst(s) responsible for the preparation of this report receives compensation based upon a variety of factors, including the quality and accuracy of research, internal/client feedback, and overall Firm revenues.

Artificial intelligence tools may have been used in the preparation of this material, including assisting in fact-finding, data analysis, pattern recognition, and content drafting.

BTIG reports are based on public information and BTIG considers the same to be reliable, comprehensive information, but makes no representation or warranty that the reports are accurate or complete. BTIG opinions and information provided in this report are as of the date of the report and may change without notice. An issuer may be classified as "Under Review" or "Research Restricted". In these cases, investors should consider any previous investment recommendation and/or rating to a subject company/issuer to no longer be current and should not be relied upon nor considered a solicitation.

This research report is not an offer to buy or sell or solicitation of an offer to buy or sell any security in any jurisdiction where such an offer or solicitation would be illegal. This research report was not drafted specifically for any particular individual or entity and is not a personal recommendation to participate in any particular trading strategy or transaction. Any recipient of this research report should obtain independent advice specific to their personal circumstances before undertaking any investment activity and must make their own independent evaluation of any securities or financial instruments.

Facts, views or opinions presented in this report have not been reviewed by, and may not reflect information known to, employees or other professionals in the "BTIG Group" (BTIG Group includes, but is not limited to, BTIG and its parents, subsidiaries and/or affiliates). BTIG Group employees, including Sales Representatives and Traders, may provide oral or written commentary or advice that may be inconsistent with the opinions and/or views expressed in this research report. BTIG Group employees and/or its affiliates not involved in the preparation of this research report may have investments in securities or derivatives of securities of companies mentioned in this report that are inconsistent with the views discussed in this report.

Private Company Disclosure: No recommendations, ratings, estimates.

Regarding private companies discussed within this report, BTIG LLC does not assign a rating system. Unlike public companies that are under BTIG LLC research coverage, there are no recommendations, ratings, or estimates available for any of the private companies referenced herein. While the information derived from and contained in this report have been obtained from sources believed to be reliable, it is important to recognize that private companies are not typically subject to the same reporting obligations as publicly traded companies. This can result in less publicly available information, potentially less transparency, and fewer sources of information regarding the private enterprises discussed in these materials. The information contained in this document may differ from information a private company may subsequently make public or otherwise share with investors. BTIG assumes no responsibility for any such discrepancies. The reader should not assume that any discussion of private companies discussed in these materials is to be regarded as an express or implied acknowledgement or accedence to any research expectation of any private company if it goes public.

Investors in securities products bear certain risks in conjunction with those investments. The value of, and income from, any investments may vary because of changes in interest rates or foreign exchange rates, securities prices or market indexes, operational or financial conditions of companies or other factors within or beyond the companies' control. Recipient of the research reports should be aware that investments in securities may pose significant risks due to the inherent uncertainty associated with relying on forecasts of various factors that can affect the earnings, cash flow and overall valuation of a company. Any investment in securities should be undertaken only upon consideration of issues relating to the recipient's overall investment portfolio and objectives (such as diversification by asset class, industry or company) as well as time horizon and liquidity needs. Further, past performance should not be taken as an indication or guarantee of future performance, and no representation or warranty, express or implied, is made regarding future performance. There may be time limitations on the exercise of options or other rights in any securities transactions.

Investing in foreign markets and securities, including ADRs, is subject to additional risks such as currency fluctuation, limited information, political instability, economic risk, and the potential for illiquid markets. Investing in emerging markets may accentuate these risks. Non-U.S. reporting issuers of foreign securities, however, may not make regular or complete public disclosure relating to their financial condition or the securities that they issue.

The trademarks and service marks contained herein are the property of their respective owners. Third-party data providers make no warranties or representations of any kind relating to the accuracy, completeness, or timeliness of the data they provide and shall not have liability of any damages of any kind relating to such data. The report or any portion hereof may not be reprinted, sold or redistributed without the written consent of BTIG. This report is intended only for use by the recipient. The recipient acknowledges that all research and analysis in this report are the property of BTIG and agrees to limit the use of all publications received from BTIG within his, or her or its, own company or organization. No rights are given for passing on, transmitting, re transmitting or reselling the information provided.

Jurisdiction and Dissemination

BTIG is a U.S. broker-dealer and member of FINRA and SIPC.

BTIG Australia Limited ACN 128 554 601, member of ASIC and ASX; BTIG Hong Kong Limited, an Exchange Participant of SEHK and licensed and regulated by the SFC; BTIG Ltd, member of the LSE, authorized and regulated by the FSA; and BTIG Singapore Pte Ltd, registered and licensed with MAS; are all separate but affiliated entities of BTIG. Unless governing law permits otherwise, you must contact a BTIG entity in your home jurisdiction for further information, or if you want to use our services in effecting a transaction.

Issued and approved for distribution in the UK and EEA by BTIG Ltd. to eligible counterparties and professional clients only. Issued and distributed in Australia to "wholesale clients" only by BTIG Australia Limited. In Singapore and Hong Kong, further information may be obtained from BTIG Singapore Pte Ltd and BTIG Hong Kong Limited, respectively.
